Suitable for single users

Suitable for small teams

Connect to the internet wherever and whenever

Standard IP

Used for accessing corporate networks via a secure VPN connection at speeds up to 492 kbps. Use email and other desktop applications, browse the internet and send large file attachments. You can even make a phone call at the same time.

Streaming IP

BGAN is the world's first mobile communications service to offer guaranteed data rates on demand. Ideal for applications where quality of service is paramount, such as live video or videoconferencing. Only available of selected BGAN terminals.

Phone

BGAN will provide high quality voice services, including calls to and from mobile phones. It supports the enhanced features of terrestrial lines and mobile networks, such as voice mail, call forwarding, call hold, call barring, and call waiting. Calls can be made using a standard desktop phone, peripheral headset or via a Bluetooth earpiece, depending on your choice of BGAN terminal.

Text

BGAN enables you to send and receive text messages via your laptop - up to the standard 160 characters, to or from any mobile phone.

Sizes

	Length	Width	Height
NERA WorldPro 1000	7.87	5.91	1.77
Thrane & Thrane Explorer 300	6.61	8.54	2.05
