email: info@qaujimautik.com

There are a few components to a tracking system. The tracking device is connected to both a battery and a two-in-one antenna (GPS & Iridium). The antenna is the only component that is outside of the protective case, however, it is suitable for harsh climates and is impact, UV, and chemical resistant.

Tracking Device

Battery Charger

Optional Cigarette Adapter

* Size may vary depending on manufacturer of protective case

4.86 to 5.53 pounds (total weight with all components)

*Dimensions are in inches
